DETAILED ACTION

This office action is a response to the amendment filed on 4/3/2007.

Examiner's Comment

1. Upon further consideration, examiner hereby withdraws the last restriction requirement office action mailed on 3/27/2007. In view of the amendment and the request for consideration, the restriction requirement mailed on 3/27/2007 is hereby withdrawn.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose the claimed invention such as after the patterned hard mask layer is removed, electroplating an electrically conductive material within the patterned insulator layer having the write coil pattern follow by performing a planarization process such as CMP over the electrically conductive material. The closest reference of Hsiao et al. teach a process of making a magnetic transducer including a process of electroplating an electrically conductive material within the etched portion of the insulator layer and performing a planarization process over the resulting structure in order to remove the remaining portions of the etched hard mask layer with the electrically conductive material. It is not obvious taken alone or in combination of other references fairly to suggest the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Claims 1, 2 and 4-22 are allowed.
